Office Action Summary	Application No. 10/721,832	Applicant(s) POISSON ET AL.	
	Examiner Kieu D. Vu	Art Unit 2173	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election with traverse of group I (claims 1-5) in the reply filed on 04/17/07 is acknowledged. However the Applicant does not present any arguments supporting the traversal. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 3-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Shrader (US 5,864,666).

Regarding claim 1, Shrader teaches a method of managing a virtual private network, the method comprising: providing a graphical user interface for displaying one or more virtual private network subscribers and one or more computers offering virtual private network functions (col. 1, lines 37-50) (col. 4, lines 55-57), the graphical user interface being programmed to display tunnels associated with either the subscribers and/or the computers offering virtual private network functions based on user input (Fig. 7) (col. 8, lines 20-44).

Regarding claim 3, Shrader teaches wherein the virtual private network functions

comprise tunneling (Fig. 7) (col. 8, lines 20-44).

Regarding claim 4, Shrader teaches wherein the virtual private network functions comprise authentication (col. 4, lines 47-54).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shrader and Moen et al. ("Moen", USP 5864604).

Regarding claim 2, Shrader does not teach extranet switches. However, such feature is known in the art as taught by Moen. Moen teaches a telecommunication network system which comprises extranet switches (col 5, lines 38-46). It would have been obvious to one of ordinary skill in the art, having the teaching of Shrader and Moen before him at the time the invention was made, to modify the managing a network taught by Shrader to include extranet switches taught by Moen with the motivation being to enable the system extend the communication.

6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shrader and Kekic et al. ("Kekic", USP 6272537).

Regarding claim 5, Shrader does not teach displaying subscribers and computers comprises displaying a hierarchical tree that includes the subscribers and the computers. However, such feature is known in the art as taught by Kekic. Kekic

teaches displaying a hierarchical tree that includes the subscribers and the computers (Fig. 3B, 6C). It would have been obvious to one of ordinary skill in the art, having the teaching of Shrader and Kekic before him at the time the invention was made, to modify the managing a network taught by Shrader to include displaying a hierarchical tree that includes the subscribers and the computers taught by Kekic so that the user will be able to easily and quickly view the relationship between the subscribers and the computers.

7. The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R. 1.111(c) to consider these references fully when responding to this action. The documents cited therein teach network tunneling which relates to the instant application.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kieu D. Vu. The examiner can normally be reached on Mon - Thu from 7:00AM to 3:00PM at 571-272-4057.
